Introduction

This document outlines the information related to the automation. It contains the automation description and the related technical specifications. It also describes the setup and configuration process.

Overview

This automation allows you to convert a file from one format to another. The available file conversions will depend on the type of file you select to convert.

For docx file types:

- Word to PDF

For pdf file types:

- PDF to image (one image file per page)
- PDF to Word (text only)

For png, jpg, or jpeg file types:

- Image to PDF
- Image to Word

For xlsx file types:

- Excel to CSV

For csv file types:

- CSV to Excel
- CSV to JSON
- CSV to XML

For json file types:

- JSON to CSV (json file must be in json array format)
- JSON to XML (json file must not be in json array format)

For xml file types:

- XML to JSON

Once you make your selection, you will also need to provide an output folder where the converted file will be generated and a filename for the new file.

Convert my file to another format

This automation allows you to convert a file into other commonly used file types.

Calendar block reference

[Cancel](#) [Continue](#)

Afterwards, the automation will display a message that the automation has finished. From this menu, you can open the output folder, repeat the process, or end the automation.

Convert my file to another format

Your automation has finished!

Your image file has been converted to a PDF file.

Great job!

[View output](#) [Repeat process](#) [Close](#)

Use Cases

- Convert files into required formats for upload
- Change files to editable formats
- Reduce file size by changing to a simpler format

Requirements, Prerequisites, & Security

System Requirements

Hardware	Minimum	Recommended
CPU	2 x 1.8GHz 32-bit (x86)	4 x 2.4GHz 64-bit (x64)
RAM	4 GB	8 GB

Prerequisites

Software	Specifications
Operating System	Windows 10
UiPath Assistant	Version 21.10 or later Desktop app for automation

Security Measures

No such security measures to be considered.

Getting Started

Bot Files

UiPathTeam.Convert.My.File.To.Another.Format.2.1.0.nupkg – Project Package to be moved to UiPath Packages folder and then installed from UiPath Assistant.

Installation Hierarchy

NuGet Package downloaded from UiPath Marketplace must be placed under UiPath – Packages folder.

Reports

No reports are generated.

Logs

No audit logs.

Support & FAQs

Support

Email: marketplacesupport@uipath.com

Link: <https://marketplace.uipath.com/contact-us>

Support on Demand option is available only to UiPath Enterprise customers. To access this type of support, you need to have an active UiPath license. For more details, please check this article: <https://docs.uipath.com/marketplace/docs/support-on-demand>.

Note: Marketplace Support On Demand doesn't include any response or resolution SLA. However, we will do our best to get back to you within two business days. If you like to open a ticket, please use the support link.

FAQs

For questions about UiPath Assistant, See [UiPath Assistant Docs](#).
